Code

Fictional data. Each section demonstrates a supported variation.

Syntax highlighting

TYPESCRIPT

```typescript
type Reading = { station: string; value: number };
const reading: Reading = { station: "Cedar", value: 12 };
console.log(reading.value);
```

Plain text fallback

```
station,accepted,reviewed
Cedar,12,true
Birch,18,false
```

Long line

JSON

```json
{"station":"Cedar","explanation":"A deliberately long record that remains readable when the available width narrows.","accepted":12,"reviewed":
true}
```
